DigiDr.

AI Digital Infrastructure for Doctors

Your patients are searching for you online. Are they finding you?

DigiDr builds and maintains your complete digital identity — automatically.

1,000+
Doctors with verified digital identities

30 mins
Live — no developer, no agency

100%
Your content. Your handles. Always.

The first stop for every patient today **is a search bar, not a referral.**

Patients research symptoms, compare specialists, and choose doctors — all before ever picking up the phone. If you're not visible online, you're invisible to the people who need you most.

77%
search online before booking a doctor

3×
more trust in doctors with a strong online presence

89%
read reviews before choosing a specialist

Your years of training, your expertise, your compassion — they deserve to be seen. DigiDr makes sure they are.

DigiDr follows NMC and global guidelines.

Being visible online matters more than ever — but it now has to be done the right way.

NO LONGER ALLOWED

- Patient testimonials and reviews used for promotion
- ‘Best doctor’, ‘No.1 Specialist’, ‘100% success’ claims
- AI-generated promotional campaigns for commercial gain
- Your photograph used for self-promotion
- Paid rankings, bought likes and followers
- Soliciting patients through social media

STILL ALLOWED — AND HOW DigiDr IS BUILT

- Health education and public-awareness content
- Factual details: qualifications, specialities, availability
- Name, qualifications and registration number on posts
- Evidence-based, verifiable, non-exaggerated information
- **DigiDr: AI-assisted content labelled as AI where required**
- **DigiDr: Accuracy and ethics reviewed before publishing**

All contents are verified. Complete control is with you.

Most doctors are experts.
Very few exist online.

Not because they lack expertise. Because they lack digital infrastructure.

01

Too busy to manage it

You're too busy saving lives to run a digital presence. DigiDr runs it in the background — AI drafts reviewed health-education content, maintains your profile, and keeps you discoverable.

02

No verified digital entity

Without a structured online identity, patients can't find you — even when they search your exact speciality in your city.

03

No infrastructure to maintain it

A social media account is not a digital presence. You need the full stack: profile, microsite, AI content, appointments, referral tracking — always on.

Your digital infrastructure, live in four steps

STEP 1

Tell Us Who You Are

5 minutes.

Share your speciality, clinic details, consultation preferences. AI structures it into your verified profile and smart microsite instantly.

STEP 2

Go Live As A Digital Entity

Published under your name.

Your profile, microsite, and AI content layer go live — from your own handles. Google indexes you within hours.

STEP 3

AI Keeps You Visible

Continuously. Automatically.

AI drafts health-education posts, reels, emailers and blogs — reviewed for medical accuracy and ethics before they go out.

STEP 4

Track Performance

One weekly dashboard.

See profile visits, microsite traffic, content performance and referral tracking — in one weekly summary. No spreadsheets.

Built differently. For doctors specifically.

Six things no other digital platform gives you.

You Own Your Digital Identity

Your verified profile and microsite belong entirely to you — not rented, not lost if you cancel.

Your Content, Your Handles

AI drafts and publishes as you — from your own handles, with your name and qualifications. Your audience grows around you, not DigiDr.

Never Lose A Referral

Every diagnostic/pathology referral is auto-mapped, logged, and summarised daily. Zero manual entry.

Patients Find You. Not A Listing.

Your microsite is SEO-structured so patients searching your speciality in your city find you — earned, never a paid ranking.

Multilingual & Speciality-Specific

Content auto-generated in English, Hindi, and regional languages — calibrated to your speciality.

Built Around NMC Rules

Health education first: no testimonials, no ‘best doctor’ claims, no paid rankings. Your name, qualifications and registration number on your content.

Health education, written for you. **Published under your name.**

AI drafts speciality-specific health-education content, reviewed for medical accuracy and ethics — published from your own professional handles.

Health-Education Posts

Evidence-based awareness content for your speciality, carrying your name, qualifications and registration number.

Reels & YouTube Shorts

Short educational videos on conditions, prevention and care — ready to publish.

e-Mailers & Blogs

Patient health-education newsletters and articles.

Health-Day & Seasonal Content

Aligned with disease awareness days and seasonal trends.

Multilingual

English, Hindi, and regional languages — same speciality accuracy.

Weekly Performance Summary

Reach, engagement, and next steps — every week.

Your microsite comes fully equipped

Everything a patient needs to find you, reach you, and book you — built in.

Appointment Scheduler

Online booking plus offline/walk-in listing — every appointment lands in one place, not scattered across a register and a phone.

Patient Tracker

Every patient and visit logged automatically, so follow-ups and history are never lost in notebooks or spreadsheets.

AI Chat Bot — 24/7

Answers patient queries about timings, services and booking around the clock, so you're reachable even when the clinic is closed.

WhatsApp Enabler

Patients message, confirm, and get reminders directly on WhatsApp — the channel they already use every day.

Integrated Blog

Speciality-verified articles published to your microsite, building authority and organic search visibility.

Patient Mailers

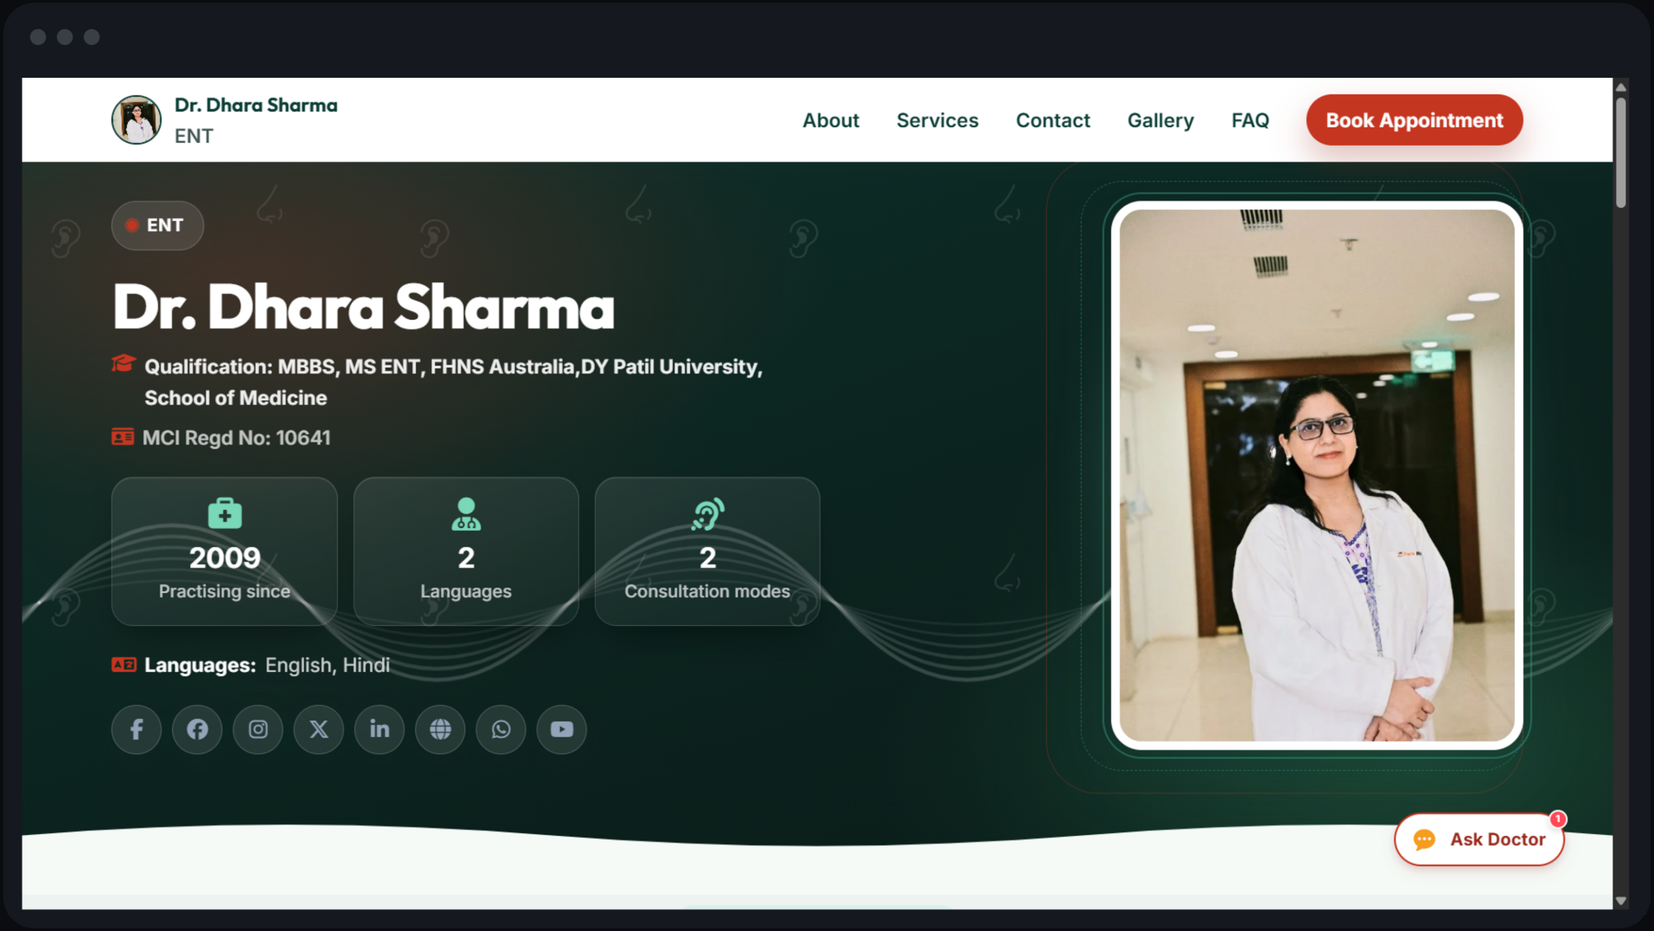

Regular, AI-drafted emails to your patients — health education, appointment reminders and practice information, sent for you.

Trending Topics

Speciality-wise and cross-speciality topics that are trending — curated for you. Stay current with the latest clinical discussions, emerging research and peer conversations across your field, refreshed regularly so every visit surfaces what matters most to your practice.

This is a real DigiDr microsite, live today

A live example of DigiDr microsite.

01 Qualifications, affiliation and experience shown up front — factual practice information

02 Clinic-visit and online booking, both live

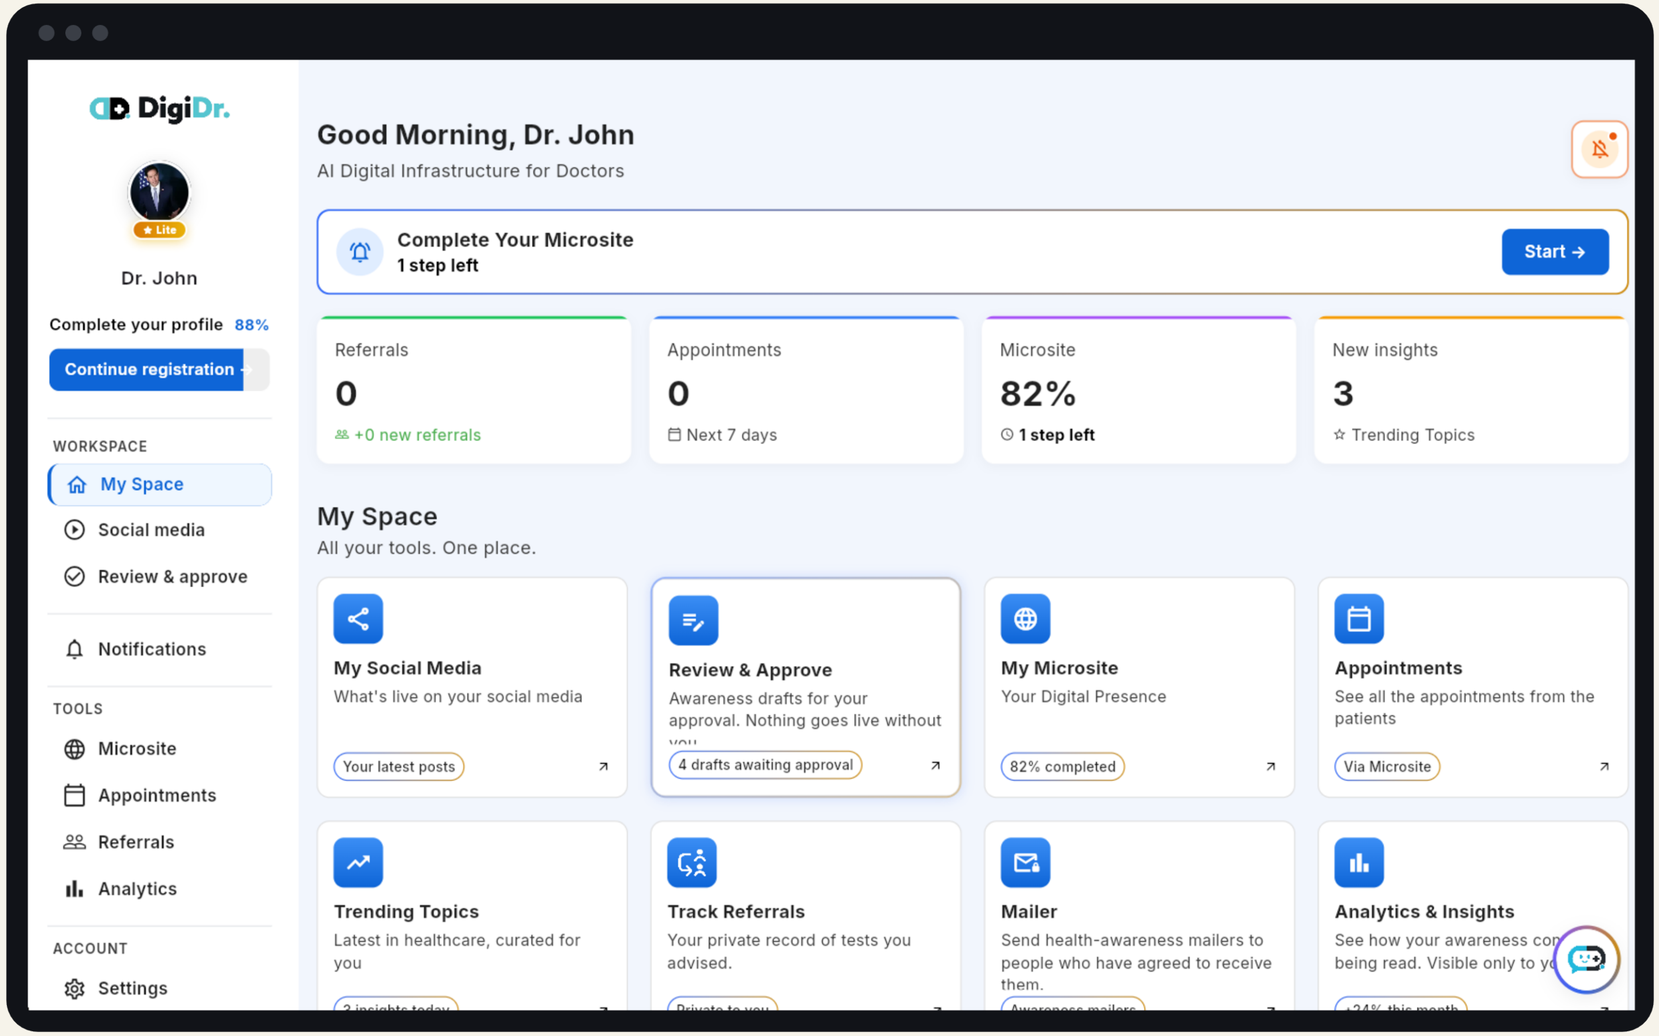

03 Speciality-specific care pathways explained in plain language

- Full referral intelligence + 2 webinars/mo
- Advanced+ analytics, dedicated onboarding

No setup fees · Cancel anytime, data stays yours · Full-feature free trial on every paid plan

Common Questions

Q **Is the content actually accurate for my speciality?**

Yes — every piece of content is speciality-verified. A cardiologist's posts are reviewed for cardiology accuracy, a dermatologist's for dermatology — never generic health content.

Q **Is DigiDr aligned with the new NMC guidelines?**

Content is built as health education, not promotion: no patient testimonials, no ‘best doctor’ or success-rate claims, no paid rankings — and every piece is reviewed for accuracy and ethics before publishing. It follows NMC and global guidelines.

Q **Is patient data secure and India-compliant?**

Yes. All patient and appointment data is encrypted and stored in compliance with Indian data protection requirements for healthcare platforms.

Q **What happens if I stay on the free Lite plan?**

Nothing expires. Lite is free forever — your verified profile, microsite, and content stay live for as long as you want, with no upgrade requirement.

Q **How long is the free trial on paid plans?**

Every paid plan includes a full-feature trial before your card is charged, with a reminder before it ends — cancel anytime, no penalty.

Q **Is everything really specific to me, not generic?**

Yes — your profile, microsite, content, and even the AI chatbot's answers are built around your speciality, location, and practice. Nothing is templated or shared.

Your digital identity is waiting.
Let's build it.

Start free, forever, on Lite — or trial Classic, Premium or Pro in full.
